

## EN Mediblink Digital thermometer Cow M379

### INSTRUCTIONS FOR USE

#### PLEASE READ CAREFULLY BEFORE USE

Mediblink Digital thermometer Cow M379 provides a quick and highly accurate reading of an individual's body temperature. To better understand its functions and to provide years of dependable results, please read all instructions for use first.

Content: 1 Digital thermometer, 1 User's Manual, 1 Storage Case

#### INTENDED USE

The digital thermometers are intended to measure the human body temperature in regular mode orally, rectally, under the arm. The devices are reusable for clinical or home use for people of all ages, including children under 8 years old with adult supervision.

#### INTENDED USER/INDICATION FOR USE

Patients or healthy people who want to measure their body temperature, and medical workers who want to measure the patient's body temperature.

Patient target group: Patients or healthy people who need or want to have their temperature measured.

#### PRODUCT ILLUSTRATION

Figure 1: Digital thermometer components

#### SPECIFICATIONS

<b>Product name:</b>	Mediblink Digital thermometer Cow M379
<b>Type:</b>	Digital thermometer (Not Predictive)
<b>Reference number / Model:</b>	M379 / DMT-427
<b>Measure Range:</b>	32.0°C–42.9°C (90.0°F–109.9°F) (°C/°F chosen by manufacturer)
<b>Accuracy:</b>	±0.1°C (±0.2°F) during 35.5°C–42.0°C (95.9°F–107.6°F) at 18°C–28°C (64.4°F–82.4°F) ambient operating range, ±0.2°C (±0.4°F) for other measuring and ambient operating range
<b>Operating mode:</b>	Direct Mode
<b>Display:</b>	Liquid crystal display, 3 1/2 digits
<b>Memory:</b>	For storing the last measured value
<b>Battery:</b>	One 1.5V DC button battery (size LR41 or SR41, UCC 392)
<b>Battery life:</b>	Approx. 200 hours of continuous operation or 1 year with 3 measurements per day
<b>Dimension:</b>	14.5 x 2.3 x 1.7 cm (L x W x H)
<b>Weight:</b>	Approx. 11 grams including battery
<b>Expected service life:</b>	Three years
<b>Ambient operating range:</b>	Temperature: 5°C–40°C (41°F–104°F) Relative humidity: 15%–95% RH Atmospheric Pressure: 700 hPa–1060 hPa
<b>Storage and transportation condition:</b>	Temperature: -20°C–55°C (-4°F–131°F) Relative humidity: 15%–95% RH Atmospheric Pressure: 700 hPa–1060 hPa
<b>Ingress Protection Rating:</b>	IP 27
<b>Classification:</b>	Type BF
<b>Contraindications:</b>	No contraindications
<b>Conforming to standards:</b>	ISO 80601-2-56 Medical electrical equipment – Part 2-56: Particular requirements for basic safety and essential performance of clinical thermometers for body temperature measurement, EN 60601-1-11 Medical electrical equipment – Part 1-11: General requirements for basic safety and essential performance – Collateral Standard. Requirements for medical electrical equipment and medical electrical systems used in the home healthcare environment and complies with the requirements of EN 60601-1-2 (EMC), IEC/EN 60601-1 (Safety) standards. And the manufacturer is ISO 13485 certified.

#### ⚠ PRECAUTIONS

- The performance of the device may be degraded should one or more of the following occur:
  - Operation outside the manufacturer's stated temperature and humidity range.
  - Storage outside the manufacturer's stated temperature and humidity range.
  - Mechanical shock (for example, drop test) or degraded sensor.
  - Patient temperature is below ambient temperature.
- Portable and mobile RF communications can affect the device. The device needs special precautions regarding EMC according to the EMC information provided in the accompany documents.

#### ⚠ WARNINGS

- Read instructions thoroughly before using digital thermometer.
- Choking Hazard: Thermometer cover and battery may be fatal if swallowed. Do not allow children to use this device without parental supervision.
- Do not use thermometer in ear. Designed use is for oral, rectal, and armpit (axilla) readings only.
- Do not place thermometer battery near extreme heat as it may explode.
- Remove battery from the device when not in operation for a long time.
- The use of temperature readings for self-diagnosis is dangerous. Consult your doctor for the interpretation of results. Self-diagnosis may lead to the worsening of existing disease conditions.
- Do not attempt measurements when the thermometer is wet as inaccurate readings may result.
- Do not bite the thermometer. Doing so may lead to breakage and/or injury.
- Do not attempt to disassemble or repair the thermometer. Doing so may result in inaccurate readings.
- After each use, disinfect the thermometer especially in case the device is used by more than one person.
- Do not force the thermometer into the rectum. Stop insertion and abort the measurement when pain is present. Failure to do so may lead to injury.
- Do not use thermometer orally after being used rectally.
- For children who are two years old or younger, please do not use the devices orally.
- If the unit has been stored at temperatures over 5°C–40°C (41°F–104°F), leave it in 5°C–40°C (41°F–104°F) ambient temperature for about 15 minutes before using it.
- Use of this equipment adjacent to or stacked with other equipment should be avoided because it could result in improper operation. If such use is necessary, this equipment and the other equipment should be observed to verify that they are operating normally.
- PORTABLE RF communications equipment (including peripherals such as antenna cables and external antennas) should be used no closer than 30 cm (12 inches) to any part of the [ME EQUIPMENT or ME SYSTEM], including cables specified by the MANUFACTURER. Otherwise, degradation of the performance of this equipment could result.
- It is not intended for use in the oxygen rich environment and presence of flammable anaesthetic mixture with air, oxygen or nitrous oxide.
- Do not put the thermometer in direct sunlight or in cotton wool, otherwise the accuracy will be affected.
- ME equipment should not be cleaned and disinfected while in use.

#### DIRECTIONS FOR USE

- Press the **On/Off** Button next to LCD display in Figure 1. A tone will sound as the screen shows **188.8.8**, followed by last recorded temperature. After showing the self-test temperature, the thermometer is now in the testing mode.
- Position thermometer in desired location (mouth, rectum, or armpit).

- Oral Use:** Place thermometer under tongue as indicated by "✓" position shown in Figure 2. Close your mouth and breathe evenly through the nose to prevent the measurement from being influenced by inhaled/exhaled air.
- Rectal Use:** Lubricate silver probe tip with petroleum jelly for easy insertion. Gently insert sensor approximately 1cm (less than 1/2") into rectum.

Figure 2

- Armpit Use:** Wipe armpit dry. Place probe in armpit and keep arm pressed firmly at side. From a medical viewpoint, this method will always provide inaccurate readings, and should not be used if precise measurements are required.
- The degree sign flashes throughout the testing process. When flashing stops an alarm will beep for approximately 10 seconds. The measured reading will appear on the LCD simultaneously. The minimum measurement time until the signalling tone (beep) must be maintained without exception. The measurement continues even after the buzzer notification.

**IMPORTANT: in order to achieve better body temperature measurement result, it is recommended to keep the probe in mouth and rectum about 2 minutes, or in armpit about 5 minutes regardless of the beep sound and at least 30 seconds measurement interval should be maintained.**

\*Note: Normally the buzzes are "Bi-Bi-Bi-Bi-"; alarm beeps more rapidly when temperature reaches 37.8°C (100°F) or higher and the buzzers are "Bi-Bi-Bi-"; Bi-Bi-Bi-"; Bi-Bi-Bi-"; Bi-Bi-Bi-";

- To prolong battery life, press the **On/Off** Button to turn unit off after testing is complete. If no action is taken, the unit will automatically shut off after around 10 minutes.

#### TROUBLESHOOTING

Error message	Problem	Solution
Lo	Temperature taken is lower than 32.0°C (90.0°F)	Turn off, wait one minute and take a new temperature via close contact and sufficient rest.
Hi	Temperature taken is higher than 42.9°C (109.9°F)	Turn off, wait one minute and take a new temperature via close contact and sufficient rest.
Err	The system is not functioning properly.	Unload the battery, wait for 1 minute and reinsert it. If the message reappears, contact the retailer for service.
	Dead battery: Battery icon is flashing, can't measure.	Replace the battery.

#### BATTERY REPLACEMENT

- Replace battery when the symbol in the lower right corner of the LCD display starts flashing.
- Pull battery cover off as shown in Figure 3.
- Gently pull-out plastic circuit board with battery chamber approximately 1cm (slightly less than 1/2") (Figure 4).
- Use pointed object such as a pen to remove old battery. Discard battery lawfully. Replace with new 1.5V DC button type LR41 or SR41, UCC392, or equivalent. Be sure battery is installed with polarity facing up. (Figure 5).
- Slide battery chamber back into place and attach cover.

Note: The following schematic diagram of battery replacement is from the back of the thermometer.

Figure 3

Figure 4

Figure 5

#### CALIBRATION

The thermometer is initially calibrated at the time of manufacture. If the thermometer is used according to the instruction of use, periodic readjustment is not required. However, we recommend checking calibration every two years or whenever clinical accuracy of the thermometer is in question. Set the temperature of the high-precision water bath temperature bath to 33.00°C, 37.00°C, 42.00°C. Turn on the thermometer and insert into the high-precision water bath and then check the laboratory accuracy of thermometer. Repeat the previous measurement process after it is stable for 10 minutes. Please send the complete device to the dealers or manufacturer.

The above recommendations do not supersede the legal requirements. The user must always comply with legal requirements for the control of the measurement, functionality and accuracy of the device which are required by the scope of relevant laws, directives or ordinances where the device is used.

#### CLEANING AND DISINFECTION

- Immerse the thermometer probe in distilled water for at least 1 minute.
- Using a clean, soft cloth to wipe the thermometer down to remove any residue.
- Repeat step 1 and 2 for three times until no soil is seen with visual inspection after cleaning.
- For thorough cleaning and disinfection, please use method A or B:
  - Method A (High level disinfection): immerse the thermometer probe in 0.55% OPA (O-Phthalaldehyde), such as CIDEX OPA, for at least 12 minutes under temperature at 20°C.
  - Method B (Low level disinfection): Using a clean soft cloth dipped in 70% medical alcohol, wipe the probe 3 times, at least one minute for each time.
- Repeat step 1 to 3 to remove OPA residuals.

Note 1: Rectal use is not recommended for home use as OPA will not be readily available outside of a hospital. If rectal measurement is necessary, we strongly recommend high level disinfection.

Note 2: Please operate according to the manual of OPA for reference.

To prevent damage to the thermometer please note and observe the following:

- Do not use benzene, paint thinner, gasoline or other strong solvents to clean the thermometer.
- Do not attempt to disinfect the sensing probe (tip) of the thermometer by immersing in alcohol, OPA or in hot water (water over 122°F/50°C) for long time.
- Do not use ultrasonic washing to clean the thermometer.

#### ELECTROMAGNETIC COMPATIBILITY INFORMATION

The device satisfies the EMC requirements of the international standard IEC 60601-1-2. The requirements are satisfied under conditions described in the table below. The device is an electrical medical product and is subject to special precautionary measures with regard to EMC which must be published in the instructions for use. Portable and mobile HF communications equipment can affect the device. Use of the unit in conjunction with non-approved accessories can affect the device negatively and alter the electromagnetic compatibility. The device should not be used directly adjacent to or between other electrical equipment.

Electromagnetic Compatibility Information – electromagnetic emission	
The device is intended for use in the electromagnetic environment specified below. The customer or the user of the device should assure that it is used in such an environment.	
Emission test	Compliance
Conducted emissions CISPR 11	Not applicable
RF emissions CISPR 11	Group 1, Class B
Harmonic emissions IEC 61000-3-2	Not applicable
Voltage fluctuations / flicker emissions IEC 61000-3-3	Not applicable

Electromagnetic Compatibility Information – electromagnetic immunity		
The device is intended for use in the electromagnetic environment specified below. The customer or the user of the device should assure that it is used in such an environment.		
Immunity test	IEC 60601 test level	Compliance level
Electrostatic discharge (ESD) IEC 61000-4-2	±8 kV contact ±2 kV, ±4 kV, ±8 kV, ±15 kV air	±8 kV contact ±2 kV, ±4 kV, ±8 kV, ±15 kV air
Electrical transient/burst IEC 61000-4-4	±2 kV for power supply lines 100 kHz repetition frequency ±1 kV for input/output lines	Not applicable
Surge IEC 61000-4-5	±0.5 kV, ±2 kV differential mode line-line	Not applicable
Voltage dips, short interruptions and voltage variations on power supply input lines IEC 61000-4-11	0% U, (100% dip in U) for 0.5 cycle at 0°, 45°, 90°, 135°, 180°, 225°, 270° and 315° 0% U, (100% dip in U) for 1 cycle at 0° 70% U, (30% dip in U) for 25/30 cycles at 0° 0% U, (100% dip in U) for 250/300 cycles at 0°	Not applicable
Power frequency (50/60 Hz) magnetic field IEC 61000-4-8	30 A/m, 50/60 Hz	30 A/m, 50/60 Hz
NOTE: U <sub>i</sub> is the a.c. mains voltage prior to application of the test level.		

Electromagnetic Compatibility Information – electromagnetic immunity	
The device is intended for use in the electromagnetic environment specified below. The customer or the user of the device should assure that it is used in such an environment.	

Immunity test	IEC 60601 test level	Compliance level
Conducted RF IEC 61000-4-6	3Vrms, 150 kHz to 80 MHz 6Vrms, 150 kHz to 80 MHz ISM bands	Not applicable
Radiated RF IEC 61000-4-3	10V/m 80 MHz to 2.7 GHz	10V/m
Proximity magnetic fields IEC 61000-4-39	30 kHz, 8 A/m, CW 134.2 kHz, 65 A/m, Pulse modulation 2.1 kHz 13.56 kHz, 7.5 A/m, CW 134.2 kHz, 65 A/m, Pulse modulation 50 kHz	30 kHz, 8 A/m, CW 134.2 kHz, 65 A/m, Pulse modulation 2.1 kHz 13.56 kHz, 7.5 A/m, CW 134.2 kHz, 65 A/m, Pulse modulation 50 kHz

NOTE 1: At 80 MHz and 800 MHz, the higher frequency range applies.  
NOTE 2: These guidelines may not apply in all situations. Electromagnetic propagation is affected by absorption and reflection from structures, objects and people.  
\* The ISM (industrial, scientific and medical) bands between 0.15 MHz and 80 MHz are 6.765 MHz to 6.795 MHz, 13.553 MHz to 13.567 MHz, 26.957 MHz to 27.283 MHz and 40.66 MHz to 40.70 MHz. The amateur radio bands between 0.15 MHz and 80 MHz are 1.8 MHz to 2.0 MHz, 3.5 MHz to 4.0 MHz, 5.3 MHz to 5.4 MHz, 7.0 MHz to 7.3 MHz, 10.1 MHz to 10.15 MHz, 14 MHz to 14.2 MHz, 18.07 MHz to 18.17 MHz, 21 MHz to 21.4 MHz, 24.89 MHz to 24.99 MHz, 28 MHz to 29.7 MHz and 50 MHz to 54 MHz.  
† The compliance levels in the ISM frequency bands between 150 kHz and 80 MHz and the frequency range 80 MHz to 2.7 GHz are intended to decrease the likelihood that mobile/portable communications equipment could cause interference if it is inadvertently brought into patient areas. For this reason, an additional factor of 10/3 has been incorporated into the formulae used in calculating the recommended separation distance for transmitters in these frequency ranges.

‡ Field strengths from fixed transmitters, such as base stations for radio (cellular/cordless) telephones and land mobile radios, amateur radios, AM and FM radio broadcast and TV broadcast cannot be predicted theoretically with accuracy. To assess the electromagnetic environment due to fixed RF transmitters, an electromagnetic site survey should be considered. If the measured field strength in the location in which the device is used exceeds the applicable RF compliance level above, the device should be observed to verify normal operation. If abnormal performance is observed, additional measures may be necessary, such as re-orienting or relocating the device.  
¶ Over the frequency range 150 kHz to 80 MHz, field strengths should be less than 3V/m.

**Recommended separation distances between RF wireless communications equipment**  
The device is intended for use in an electromagnetic environment in which radiated RF disturbances are controlled. The customer or the user of the device can help prevent electromagnetic interference by maintaining a minimum distance between RF wireless communications equipment and the device as recommended below, according to the maximum output power of the communications equipment.

Frequency (MHz)	Maximum Power (W)	Distance (m)	IEC 60601 Test Level	Compliance Level
385	1.8	0.3	27	27
450	2	0.3	28	28
710, 745, 780	0.2	0.3	9	9
810, 870, 930	2	0.3	28	28
1720, 1845, 1970	2	0.3	28	28
2450	2	0.3	28	28
5240, 5500, 5785	0.2	0.3	9	9

Note 1: These guidelines may not apply in all situations. Electromagnetic propagation is affected by absorption and reflection from structures, objects and people.

## ⚠ WARNING

- This device should not be used in the vicinity or on the top of other electronic equipment such as cell phone, transceiver or radio control products. If you have to do so, the device should be observed to verify normal operation.
- The use of accessories and power cord other than those specified, with the exception of cables sold by the manufacturer of the equipment or system as replacement parts for internal components, may result in increased emissions or decreased of the equipment or system.

## LIST OF SYMBOLS

Symbol	Explanation
	Electrical devices are recyclable material and should not be disposed of with household waste after use! Help us protect the environment and save resources and take this device to the appropriate collection points. Please contact the organization which is responsible for waste disposal in your area if any questions.
	Applied part of type BF
	MR Unsafe

## WARRANTY

**Product: Mediblink Digital thermometer Cow M379**  
**Manufacturer for (importer for EU & distributor):** Mediblink d.o.o., Gubčeva cesta 19, 8210 Trebnje, Slovenia; info@mediblink.com; www.mediblink.com

**Seller's name, address, signature and stamp\*:**

**Date of extradition / sales\*:**

\*If the invoice is accompanied by this warranty, and if all above information can be seen from the invoice, it is not necessary to fill in this field.

## WARRANTY TERMS

Dear customers!  
The warranty period is **10 years** and starts from the day of product purchase. In case of product claim, you have to show the invoice. We kindly ask you to save the invoice!

Unfortunately, wrong handling with the device is a reason for 95% of customer complains. You can easily avoid any problem, by getting useful information provided by our special service department. To reach our service department, you can call or send e-mail to Mediblink local distributor.

Before sending the product back to retailer, we kindly ask you to call our service department, to get help about how to use the device to save you with unneeded trips.

The manufacturer guarantees free elimination of all imperfections due to defects in material or manufacturing procedure by repairing or replacing the product. In case that the product cannot be repaired or replaced, the customer will get the money refund. The guarantee is not valid in case of the force majeure, accidents or unexpected events (such as lightning, water, fire etc.), incorrect use or incorrect transport, non-compliance with safety and maintaining regulations or in case of unprofessional product intervention.

Traces of every day product usage (scratches, abrasions) and not subject to claim. The warranty does not eliminate the customer rights, which originate from seller responsibility for product flaws. By accepting the claimed product by the service department, the service department does not take responsibility for loss of saved data or settings on the product. All product repairs, which are performed out of product warranty period, have to be paid by customer by prior notice.

The manufacturer guarantees the product quality and flawless product operation in the warranty period, which starts with the day of product purchase. If the product cannot be repaired in 45 days, the product will be replaced with a new one. In case that the product cannot be replaced, the money will be refunded to the customer.

In case of product claim, call or send e-mail to Mediblink local distributor.

Any serious incident that has occurred in relation to the device should be reported to the manufacturer and the Competent Authority of the Member State in which the user and/or patient is established.

## DE Mediblink Digitales Thermometer Kuh M379

### GEBRAUCHSANWEISUNGEN

#### BITTE VOR GEBRAUCH SORGFÄLTIG LESEN

Das Mediblink Digitale Thermometer Kuh M379 ermöglicht eine schnelle und hochpräzise Messung der Körpertemperatur einer Person. Um die Funktionen besser zu verstehen und jahrelang verlässliche Ergebnisse zu erzielen, lesen Sie bitte zuerst die gesamte Gebrauchsanweisung.  
Inhalt: 1 Digitales Thermometer, 1 Benutzerhandbuch, 1 Aufbewahrungsbbox

#### VERWENDUNGSZWECK

Die digitalen Thermometer sind dazu bestimmt, die menschliche Körpertemperatur regelmäßig oral, rektal, unter dem Arm zu messen. Die Geräte sind wiederverwendbar und können in der Klinik oder zu Hause von Menschen aller Altersgruppen verwendet werden, einschließlich Kindern unter 8 Jahren unter Aufsicht von Erwachsenen.

#### VERWENDUNGSZWECK/INDIKATION FÜR DEN GEBRAUCH

Patienten oder gesunde Menschen, die ihre Körpertemperatur messen möchten, und medizinisches Personal, das die Körpertemperatur des Patienten messen möchte.

Patienten-Zielgruppe: Patienten oder gesunde Menschen, die ihre Temperatur messen lassen müssen oder wollen.

#### PRODUKTABBILDUNG

Abbildung 1: Komponenten eines digitalen Thermometers

#### SPEZIFIKATIONEN

**Produktname:** Mediblink Digitales Thermometer Kuh M379  
**Typ:** Digitales Thermometer (nicht prädiaktiv)  
**Referenznummer / Modell:** M379 / DMT-427  
**Messbereich:** 32,0 °C–42,9 °C (90,0 °F–109,9 °F) (°C/°F vom Hersteller ausgewählt)  
**Genauigkeit:** ±0,1 °C (±0,2 °F) bei 35,5 °C–42,0 °C (95,9 °F–107,6 °F) bei 18 °C–28 °C (64,4 °F–82,4 °F) Umgebungsbetriebsbereich; ±0,2 °C (±0,4 °F) für andere Mess- und Umgebungsbetriebsbereiche

- Betriebsart:** Direkt-Modus
- Anzeige:** Flüssigkristallanzeige, 3 1/2 Ziffern
- Speicher:** Zum Speichern des letzten Messwerts.
- Batterie:** Eine 1,5 V DC Knopf-Batterie (Größe LR41 oder SR41, UCC 392)
- Lebensdauer der Batterie:** Ca. 200 Stunden Dauerbetrieb oder 1 Jahr mit 3 Messungen pro Tag
- Abmessungen:** 14,5 x 2,3 x 1,7 cm (L x B x H)
- Gewicht:** Ca. 11 Gramm inklusive Batterie
- Erwartete Nutzungsdauer:** Drei Jahre
- Betriebsbereich in der Umgebung:** Temperatur: 5 °C–40 °C (41 °F–104 °F) Relative Luftfeuchtigkeit: 15 %–95 % RH Atmosphärischer Druck: 700 hPa–1060 hPa
- Lagerung und Transportbedingungen:** Temperatur: –20 °C–55 °C (–4 °F–131 °F) Relative Feuchtigkeit: 15 %–95 % RH Atmosphärischer Druck: 700 hPa–1060 hPa
- IP-Schutzart:** IP 27
- Klassifizierung:** Typ BF
- Kontraindikationen:** Keine Kontraindikationen
- Konformität mit Normen:** ISO 80601-2-56 Medizinische elektrische Geräte – Teil 2-56: Besondere Anforderungen an die grundlegende Sicherheit und Leistungsmerkmale von Fieberthermometern zur Messung der Körpertemperatur; EN 60601-1-11 Medizinische elektrische Geräte – Teil 1-11: Allgemeine Anforderungen an die grundlegende Sicherheit und die wesentlichen Leistungsmerkmale – Sicherheitsstandard; Anforderungen an medizinische elektrische Geräte und medizinische elektrische Systeme, die in der häuslichen Gesundheitsfürsorge verwendet werden, und die Anforderungen der Normen EN 60601-1-2 (EMV), IEC/EN 60601-1 (Sicherheit) erfüllen. Und der Hersteller ist nach ISO 13485 zertifiziert.

#### ⚠ VORSICHTSMASSNAHMEN

- Die Leistung des Geräts kann beeinträchtigt werden, wenn einer oder mehrere der folgenden Fälle eintreten:
  - der Betrieb außerhalb des vom Hersteller angegebenen Temperatur- und Feuchtigkeitsbereichs;
  - Lagerung außerhalb des vom Hersteller angegebenen Temperatur- und Feuchtigkeitsbereichs;
  - mechanische Erschütterungen (z. B. Fallesst) oder ein beschädigter Sensor;
  - die Temperatur des Patienten liegt unter der Umgebungstemperatur.
- Tagbare und mobile RF-Kommunikation kann das Gerät beeinträchtigen. Das Gerät erfordert besondere Vorsichtsmaßnahmen hinsichtlich der EMV gemäß den EMV-Informationen in den Begleitdokumenten.

#### ⚠ WARNUNGEN

- Lesen Sie die Anweisungen sorgfältig durch, bevor Sie das Digitalthermometer verwenden.
- Erstreckungsfahrt: Batterieabdeckung und Batterie können beim Verschlucken tödlich sein. Erlauben Sie Kindern nicht, dieses Gerät ohne elterliche Aufsicht zu benutzen.
- Verwenden Sie das Thermometer nicht im Ohr. Die Verwendung ist nur für orale, rektale und Achselhöhlen-Messungen vorgesehen.

Die Verwendung von anderem als dem angegebenen Zubehör und Netz Kabeln, die vom Hersteller des Geräts oder Systems als Ersatzteile für interne Komponenten verkauft werden, kann zu erhöhten Emissionen oder einer Verschlechterung des Geräts oder Systems führen.

## GARANTIEBEDINGUNGEN

Liebe Kunden!

Die Garantiezeit beträgt **10 Jahre** und beginnt mit dem Tag des Produktkaufs. Im Falle einer Produktreklamation müssen Sie die Rechnung vorlegen. Wir bitten Sie, die Rechnung aufzubewahren!

Leider beruhen 95 % der Kundenbeschwerden auf dem falschen Umgang mit dem Gerät. Sie können jedes Problem leicht vermeiden, indem Sie nützliche Informationen von unserer speziellen Serviceabteilung erhalten. Um unsere Serviceabteilung zu erreichen, können Sie anrufen oder eine E-Mail an den Mediblink-Händler vor Ort senden.

Bevor Sie das Produkt an den Händler zurückschicken, bitten wir Sie, unsere Serviceabteilung anzurufen, um Hilfe bei der Verwendung des Geräts zu erhalten und Ihnen unnötige Wege zu ersparen.

Der Hersteller garantiert die kostenlose Beseitigung aller Mängel, die auf Material- oder Herstellungsfehler zurückzuführen sind, durch Reparatur oder Ersatz des Produkts. Falls das Produkt nicht repariert oder ersetzt werden kann, erhält der Kunde sein Geld zurück. Die Garantie gilt nicht bei höherer Gewalt, Unfällen oder unerwarteten Ereignissen (wie Blitzschlag, Wasser, Feuer usw.), unsachgemäßer Verwendung oder unsachgemäßem Transport, Nichteinhaltung von Sicherheits- und Wartungsvorschriften oder bei unsachgemäßem Eingriff in das Produkt.

Gebrauchsspuren des Produkts (Kratzer, Abschürfungen) sind kein Reklamationsgrund. Die Garantie hebt die Rechte des Kunden nicht auf, die sich aus der Verantwortung des Verkäufers für Produktmängel ergeben. Durch die Annahme des reklamierten Produkts durch den Kundendienst übernimmt der Kundendienst keine Verantwortung für den Verlust von gespeicherten Daten oder Einstellungen auf dem Produkt. Alle Produktreparaturen, die außerhalb der Produktgarantiezeit durchgeführt werden, müssen vom Kunden nach vorheriger Ankündigung bezahlt werden.

Der Hersteller garantiert die Produktqualität und den einwandfreien Betrieb des Produkts innerhalb der Garantiezeit, die mit dem Tag des Kaufs des Produkts beginnt. Wenn das Produkt nicht innerhalb von 45 Tagen repariert werden kann, wird es durch ein neues Produkt ersetzt. Falls das Produkt nicht ersetzt werden kann, wird das Geld an den Kunden zurückerstattet.

Im Falle einer Produktreklamation wenden Sie sich bitte telefonisch oder per E-Mail an den Mediblink-Händler vor Ort.

Jeder schwerwiegende Zwischenfall, der im Zusammenhang mit dem Produkt aufgetreten ist, sollte dem Hersteller und der zuständigen Behörde des Mitgliedstaats, in dem der Anwender und/oder Patient niedergelassen ist, gemeldet werden.

## FR Mediblink Thermomètre numérique Vache M379

### MODE D'EMPLOI

### VEUILLEZ LIRE ATTENTIVEMENT AVANT UTILISATION

Le Mediblink Thermomètre numérique Vache M379 permet une lecture rapide et très précise de la température corporelle d'un individu. Pour mieux comprendre ses fonctions et obtenir des résultats fiables pendant des années, veuillez d'abord lire toutes les instructions d'utilisation.

Contenu : 1 thermomètre numérique, 1 mode d'emploi, 1 étui de rangement

### USAGE PRÉVU

Les thermomètres numériques sont destinés à mesurer la température du corps humain en mode régulier par voie orale, rectale, sous le bras. Les dispositifs sont réutilisables en clinique ou à domicile pour les personnes de tout âge, y compris les enfants de moins de 8 ans sous la surveillance d'un adulte.

### UTILISATEUR PRÉVU/INDICATION D'UTILISATION

Patient ou personnes en bonne santé qui souhaitent mesurer leur température corporelle, et personnel médical qui souhaite mesurer la température corporelle du patient.

Groupe cible de patients : Patients ou personnes en bonne santé qui ont besoin ou souhaitent que leur température soit mesurée.

### ILLUSTRATION DE PRODUITS

Figure 1 : Composants du thermomètre numérique

### CARACTÉRISTIQUES TECHNIQUES

**Nom du produit :** Mediblink Thermomètre numérique Vache M379  
**Type :** Thermomètre numérique (non prédictif)  
**Numéro de référence/Modèle :** M379 / DMT-427  
**Plage de mesure :** 32,0 °C–42,9 °C (90,0 °F–109,9 °F) (°C/°F choisi par le fabricant)  
**Précision :** ±0,1 °C (±0,2 °F) de 35,5 °C à 42,0 °C (95,9 °F–107,6 °F) sur une plage de fonctionnement ambiante à 18 °C–28 °C (64,4 °F–82,4 °F), ±0,2 °C (±0,4 °F) pour d'autres plages de mesure et de fonctionnement ambiante  
**Mode de fonctionnement :** Mode direct  
**Affichage :** Affichage à cristaux liquides, 3 1/2 chiffres  
**Mémoire :** Pour mémoriser la dernière valeur mesurée  
**Pile :** Une pile bouton de 1,5 V CC (taille LR41 ou SR41, UCC 392)  
**Durée de vie de la pile :** Environ 200 heures de fonctionnement continu ou 1 an avec 3 mesures par jour  
**Dimensions :** 14,5 x 2,3 x 1,7 cm (L x l x H)  
**Poids :** Environ 11 grammes, pile comprise  
**Durée de vie prévue :** Trois ans  
**Plage de fonctionnement ambiante :** Température : 5 °C–40 °C (41 °F–104 °F) Humidité relative : 15 %–95 % HR Pression atmosphérique : 700 hPa–1060 hPa  
**Conditions de stockage et de transport :** Température : -20 °C–55 °C (-4 °F–131 °F) Humidité relative : 15 %–95 % HR Pression atmosphérique : 700 hPa–1060 hPa  
**Indice de protection contre les agressions :** IP 27

**Classification :** Type BF  
**Contre-indications :** Aucune contre-indication  
**Conformité aux normes :** ISO 80601-2-56 Appareils électromédicaux – Partie 2-56 : Exigences particulières pour la sécurité de base et les performances essentielles des thermomètres médicaux pour la mesure de la température corporelle, EN 60601-1-11 Appareils électromédicaux – Partie 1-11 : Exigences générales pour la sécurité de base et les performances essentielles – Norme collatérale : Exigences pour les équipements électriques médicaux et les systèmes électriques médicaux utilisés dans l'environnement des soins de santé à domicile et conformes aux exigences des normes EN 60601-1-2 (CEM), IEC/EN 60601-1 (Sécurité). Le fabricant est certifié ISO 13485.

### PRÉCAUTIONS

- Les performances de l'appareil peuvent se dégrader si l'une ou plusieurs des situations suivantes se produisent :
  - Fonctionnement en dehors de la plage de température et d'humidité indiquée par le fabricant.
  - Stockage en dehors de la plage de température et d'humidité indiquée par le fabricant.
  - Choc mécanique (par exemple, test de chute) ou capteur dégradé.
  - La température du patient est inférieure à la température ambiante.
- Les communications RF portables et mobiles peuvent affecter l'appareil. L'appareil doit faire l'objet de précautions particulières en ce qui concerne la compatibilité électromagnétique, conformément aux informations sur la compatibilité électromagnétique fournies dans les documents d'accompagnement.

### AVERTISSEMENTS

- Lisez attentivement les instructions avant d'utiliser le thermomètre numérique.
- Risque d'étouffement : Le bouchon du thermomètre et la pile peuvent être mortels en cas d'ingestion. Ne laissez pas les enfants utiliser cet appareil sans surveillance parentale.
- N'utilisez pas le thermomètre dans l'oreille. L'usage prévu concerne uniquement les lectures orales, rectales et sous l'aisselle (axillaire).
- Ne placez pas la pile du thermomètre à proximité d'une source de chaleur extrême, car elle pourrait exploser.
- Retirez la pile de l'appareil en cas de non-utilisation prolongée.
- Ne tentez pas d'effectuer des mesures lorsqu'il le thermomètre est mouillé, car vous risquez d'obtenir des résultats inexacts.
- Ne mordez pas le thermomètre. Vous risqueriez de le casser et/ou de vous blesser.
- N'essayez pas de démonter ou de réparer le thermomètre. Vous risquez ainsi d'obtenir des relevés inexacts.
- Après chaque utilisation, désinfectez le thermomètre, surtout s'il est utilisé par plusieurs personnes.
- Ne forcez pas le thermomètre à pénétrer dans le rectum. Arrêtez l'insertion et interrompez la mesure en cas de douleur. Le non-respect de cette consigne peut entraîner des blessures.
- N'utilisez pas le thermomètre par voie orale après l'avoir utilisé par voie rectale.
- Pour les enfants de deux ans ou moins, n'utilisez pas les dispositifs par voie orale.
- Si l'appareil a été stocké à des températures supérieures à 5 °C–40 °C (41 °F–104 °F), laissez-le à une température ambiante de 5 °C–40 °C (41 °F–104 °F) pendant environ 15 minutes avant de l'utiliser.
- L'utilisation de cet appareil à côté ou empilé avec d'autres appareils doit être évitée, car elle pourrait entraîner un dysfonctionnement. Si une telle utilisation est nécessaire, cet équipement et les autres équipements doivent être observés pour vérifier qu'ils fonctionnent normalement.
- Les équipements de communication RF portables (y compris les périphériques tels que les câbles d'antenne et les antennes externes) ne doivent pas être utilisés à moins de 30 cm (12 pouces) de toute partie de l'ÉQUIPEMENT ME ou SYSTÈME ME, y compris les câbles précisés par le FABRICANT. Dans le cas contraire, les performances de l'appareil pourraient se dégrader.
- Il n'est pas destiné à être utilisé dans un environnement riche en oxygène et en présence d'un mélange explosif inflammable avec de l'air, de l'oxygène ou de l'oxyde nitreux.
- Ne placez pas le thermomètre à la lumière directe du soleil ou avec du coton, sinon la précision sera affectée.
- L'équipement ME ne doit pas être nettoyé ni désinfecté pendant son utilisation.

### MODE D'EMPLOI

- Appuyez sur le bouton Marche/Arrêt situé à côté de l'écran LCD de la figure 1. Un signal sonore retentit lorsque l'écran affiche **188.8°C**, suivi de la dernière température enregistrée. Après avoir affiché la température d'autotest, le thermomètre est maintenant en mode de test.

## GARANTIE

**Prodotto: Mediblink Termometro numerico Vache M379**

**Fabriqueur (importateur pour l'UE et distributeur):** Mediblink d.o.o., Gubčeva cesta 19, 8210 Trebnje, Slovenia; info@mediblink.com; www.mediblink.com

**Nom, adresse, signature et cachet du vendeur\* :**

**Date de l'extradition/de la vente\* :**

\* Si la facture est accompagnée de cette garantie et si toutes les informations ci-dessus sont visibles sur la facture, il n'est pas nécessaire de remplir ce champ.

## CONDITIONS DE GARANTIE

Chers clients!

La période de garantie est de **10 ans** et commence le jour de l'achat du produit. En cas de réclamation concernant un produit, vous devez présenter la facture. Nous vous demandons de bien vouloir conserver la facture!

Malheureusement, une mauvaise manipulation de l'appareil est à l'origine de 95 % des réclamations des clients. Vous pouvez facilement éviter tout problème en obtenant des informations utiles fournies par notre service spécial. Pour rejoindre notre service après-vente, vous pouvez appeler ou envoyer un e-mail au distributeur local de Mediblink.

Avant de renvoyer le produit au détaillant, nous vous demandons de bien vouloir appeler notre service après-vente pour obtenir de l'aide sur l'utilisation du dispositif afin de vous éviter des déplacements inutiles.

Le fabricant garantit l'élimination gratuite de toutes les imperfections dues à des défauts de matériau ou de procédure de fabrication en réparant ou en remplaçant le produit. Si le produit ne peut être réparé ou remplacé, le client sera remboursé. La garantie n'est pas valable en cas de force majeure, d'accidents ou d'événements imprévus (tels que la foudre, l'eau, le feu, etc.), d'utilisation ou de transport incorrects, de non-respect des règles de sécurité et d'entretien ou en cas d'intervention non professionnelle sur le produit.

Traces d'utilisation quotidienne du produit (rayures, abrasions) et non sujettes à réclamation. La garantie ne supprime pas les droits du client, qui découlent de la responsabilité du vendeur pour les défauts du produit. En acceptant le produit réclamé par le service d'assistance, ce dernier n'est pas responsable de la perte des données ou des paramètres sauvegardés dans le produit. Toutes les réparations effectuées en dehors de la période de garantie du produit doivent être payées par le client moyennant une notification préalable.

Le fabricant garantit la qualité et le fonctionnement irréprochable du produit pendant la période de garantie, qui commence le jour de l'achat du produit. Si le produit ne peut être réparé dans les 45 jours, il sera remplacé par un nouveau produit. Si le produit ne peut être remplacé, l'argent sera remboursé au client.

En cas de réclamation concernant le produit, appelez ou envoyez un e-mail au distributeur local de Mediblink.

Tout incident grave lié au dispositif doit être signalé au fabricant et à l'autorité compétente de l'État membre dans lequel l'utilisateur et/ou le patient est établi.

## ITA Mediblink Termometro digitale Mucca M379

### ISTRUZIONI PER L'USO

#### DA LEGGERE ATTENTAMENTE PRIMA DELL'USO

Il Mediblink Termometro digitale Mucca M379 fornisce una lettura rapida e molto precisa della temperatura corporea di una persona. Per comprendere meglio le sue funzioni e per ottenere risultati affidabili per anni, si consiglia di leggere prima tutte le istruzioni per l'uso.

Contenuto: 1 Termometro digitale, 1 Manuale d'uso, 1 Custodia

#### USO PREVISTO

I termometri digitali sono destinati a misurare la temperatura del corpo umano in modalità regolare per via orale, rettale, sotto il braccio. I dispositivi sono riutilizzabili per uso clinico o domestico per persone di tutte le età, compresi i bambini sotto gli 8 anni con la supervisione di un adulto.

#### UTENTE PREVISTO/INDICAZIONI PER L'USO

Pazienti o persone sane che vogliono misurare la propria temperatura corporea, e operatori medici che vogliono misurare la temperatura corporea del paziente.

Gruppo target di pazienti: infermiere o persone sane che devono o vogliono farsi misurare la temperatura.

#### ILLUSTRAZIONE DEL PRODOTTO

Figura 1: Componenti del termometro digitale

#### SPECIFICHE

**Nome del prodotto:** Mediblink Termometro digitale Mucca M379  
**Tipo:** Termometro digitale (non predittivo)  
**Numero di riferimento/Modello:** M379 / DMT-427  
**Intervallo di misurazione:** 32,0 °C-42,9 °C (90,0 °F-109,9 °F) (°C/°F scelto dal produttore) ±0,1 °C (±0,2 °F) durante 35,5 °C-42,0 °C (95,9 °F-107,6 °F) a 18 °C-28 °C (64,4 °F-82,4 °F) per l'intervallo di funzionamento ambientale, ±0,2 °C (±0,4 °F) per altri intervalli di misurazione e funzionamento ambientale  
**Precisione:** Modalità diretta  
**Modalità operativa:** Display a cristalli liquidi, 3 cifre e mezzo  
**Memoria:** Spazio per memorizzare l'ultimo valore misurato  
**Batteria:** Una batteria a bottone da 1,5 V DC (formato LR41 o SR41, UCC 392)  
**Durata della batteria:** Circa 200 ore di funzionamento continuo o 1 anno con 3 misurazioni al giorno

**Dimensione:** 14,5 x 2,3 x 1,7 cm (Lu x La x Lp)  
**Peso:** Circa 11 grammi, batteria inclusa  
**Vita utile prevista:** Tre anni  
**Gamma di funzionamento ambientale:** Temperatura: 5 °C-40 °C (41 °F-104 °F) Umidità relativa: 15 %-95 % UR Pressione atmosferica: 700 hPa-1060 hPa  
**Condizioni di conservazione e trasporto:** Temperatura: -20 °C-55 °C (-4 °F-131 °F) Umidità relativa: 15 %-95 % UR Pressione atmosferica: 700 hPa-1060 hPa

**Grado di protezione dall'ingresso:** IP 27  
**Classificazione:** Tipo BF  
**Controindicazioni:** Nessuna controindicazione  
**Conformità alle norme:** ISO 80601-2-56 Apparecchi elettromedicali - Parte 2-56: Requisiti particolari per la sicurezza di base e le prestazioni essenziali dei termometri clinici per la misurazione della temperatura corporea, EN 60601-1-11 Apparecchi elettromedicali - Parte 1-11: Requisiti generali per la sicurezza di base e le prestazioni essenziali - Norma collaterale: Requisiti per le apparecchiature elettromedicali e i sistemi elettromedicali utilizzati nell'ambiente sanitario domestico, soddisfa i requisiti delle norme EN 60601-1-2 (EMC) e IEC/EN 60601-1 (Sicurezza). Il produttore è certificato secondo la norma ISO 13485.

#### PRECAUZIONI

- Le prestazioni del dispositivo possono danneggiarsi in presenza di una o più delle seguenti condizioni:
  - Funzionamento al di fuori dell'intervallo di temperatura e umidità indicato dal produttore.
  - Conservazione al di fuori dell'intervallo di temperatura e umidità indicato dal produttore.
  - Shock meccanico (ad esempio, test di caduta) o sensore degradato.
  - La temperatura del paziente è inferiore alla temperatura ambiente.
- Presenza di dispositivi portatili e mobili per la comunicazione a RF che possono influenzare il funzionamento del dispositivo. Il dispositivo necessita di particolari precauzioni in materia di EMC, in base alle informazioni EMC fornite nei documenti d'accompagnamento.

#### AVVERTENZE

- Leggere attentamente le istruzioni prima di usare il termometro digitale.
- Pericolo di soffocamento: il tappo del termometro e la batteria possono essere fatali se ingeriti. Non permettere ai bambini di utilizzare questo dispositivo senza la supervisione dei genitori.
- Non usare il termometro nell'orecchio. L'uso previsto è solo per effettuare le letture orali, rettali e ascellari.
- Non lasciare la batteria del termometro in prossimità di fonti di calore estremo, perché potrebbe esplodere.

- Rimuovere la batteria dal dispositivo quando non è in funzione per un tempo prolungato.
- L'uso delle letture della temperatura con finalità di autodiagnosi è pericoloso. Consultare il proprio medico per l'interpretazione dei risultati. L'autodiagnosi può portare al peggioramento delle condizioni patologiche esistenti.
- Non cercare di effettuare le misurazioni quando il termometro è bagnato, perché le letture potrebbero essere imprecise.
- Non mordere il termometro. Potrebbe, infatti, causare rotture e/o lesioni.
- Non cercare di smontare o riparare il termometro. Le letture potrebbero risultare imprecise.
- Dopo ogni utilizzo, disinfettare il termometro, soprattutto se il dispositivo viene utilizzato da più persone.
- Non forzare il termometro nel retto. Interrompere l'inserimento e interrompere la misurazione in presenza di dolore. La mancata osservanza di questa precauzione può causare lesioni.
- Non utilizzare il termometro per via orale dopo averlo usato per via rettale.
- Per i bambini di età pari o inferiore a due anni, non utilizzare i dispositivi per via orale.
- Se l'unità è stata conservata a temperature superiori a 5 °C-40 °C (41 °F-104 °F), deve essere lasciata sulla temperatura di 5 °C-40 °C (41 °F-104 °F) a temperatura ambiente per circa 15 minuti prima di essere utilizzata.
- L'uso di questa apparecchiatura in posizione adiacente o impilata con altre apparecchiature va evitato perché potrebbe causare un malfunzionamento. Se tale uso è necessario, questa apparecchiatura e le altre devono essere osservate per verificare che funzionino normalmente.
- Le apparecchiature di comunicazione portatili a RF (comprese le periferiche come i cavi dell'antenna e le antenne esterne) devono essere utilizzate a non meno di 30 cm (12 pollici) da qualsiasi parte dell'APPARECCHIATURA ME o SISTEMA ME, compresi i cavi specificati dal FABBRICANTE. In caso contrario, si potrebbe verificare una degradazione delle prestazioni dell'apparecchiatura.
- Il termometro non è destinato all'uso in un ambiente ricco di ossigeno e in presenza di una miscela anestetica infiammabile con aria, ossigeno o protossido di azoto.
- Non esporre il termometro alla luce diretta del sole o usare con l'ovatta, altrimenti la sua precisione sarà compromessa.
- Le apparecchiature ME non devono essere pulite e disinfettate mentre sono in uso.

#### ISTRUZIONI PER L'USO

- Premere il pulsante **On/Off** vicino al display LCD nella Figura 1. Verrà emesso un segnale acustico mentre lo schermo mostra **188.8°C**, seguito dall'ultima temperatura registrata. Dopo aver mostrato la temperatura dell'autotest, il termometro è ora in modalità di test.
- Posizionare il termometro nella posizione desiderata (bocca, retto o ascella).
  - Uso orale:** Posizionare il termometro sotto la lingua come indicato dalla posizione nella Figura 2. Chiudere la bocca e respirare normalmente attraverso il naso per evitare che la misurazione sia influenzata dall'aria inspirata/esalata.
  - Uso rettale:** Lubrificare la punta della sonda d'argento con gelatina di petrolio per facilitare l'inserimento. Inserire delicatamente il sensore per circa 1 cm (meno di 1/2") nel retto.
  - Uso ascellare:** Asciugare l'ascella. Posizionare la sonda nell'ascella e tenere il braccio ben premuto sul fianco. Dal punto di vista medico, questo metodo fornirà sempre letture imprecise e non dovrebbe essere utilizzato se sono necessarie misurazioni precise.
- Il segno del grado lampeggia durante il processo di test. Quando il lampeggiamento si interrompe, verrà emesso un segnale acustico per circa 10 secondi. La lettura misurata apparirà contemporaneamente sul display LCD. Il tempo minimo di misurazione fino al tono di segnalazione (bip) deve essere mantenuto senza interruzioni. La misurazione continua anche dopo la notifica del cicalino.

**IMPORTANTE: per ottenere un risultato migliore nella misurazione della temperatura corporea, si raccomanda di tenere la sonda nella bocca e nel retto per circa 2 minuti, o nell'ascella per circa 5 minuti, indipendentemente dal segnale acustico, e di mantenere un intervallo di misurazione di almeno 30 secondi.**

\*Nota: Normalmente i segnali acustici sono "Bi-Bi-Bi- Bi-"; l'allarme suona più rapidamente quando la temperatura raggiunge 37,8 °C (100 °F) o superiore, e i segnali del cicalino sono "Bi-Bi-Bi- Bi-Bi-Bi- Bi-Bi-Bi-".

- Per prolungare la durata della batteria, premere il pulsante **On/Off** per spegnere l'unità al termine del test. Se non si interviene, l'unità si spegnerà automaticamente dopo circa 10 minuti.

#### RISOLUZIONE DEI PROBLEMI

Messaggio d'errore	Problema	Soluzione
<b>Lo</b>	La temperatura rilevata è inferiore a 32,0 °C (90,0 °F)	Spegnere, attendere un minuto e rilevare una nuova temperatura a stretto contatto e con una pausa sufficiente.
<b>Hi</b>	La temperatura rilevata è superiore a 42,9 °C (109,9 °F)	Spegnere, attendere un minuto e rilevare una nuova temperatura a stretto contatto e con una pausa sufficiente.
<b>Err</b>	Il sistema non funziona correttamente.	Scaricare la batteria, attendere 1 minuto e ricaricarla. Se il messaggio riappare, contattare il rivenditore per l'assistenza.
	Batteria scarica: L'icona della batteria lampeggia, non è possibile effettuare misurazioni.	Sostituire la batteria.

#### SOSTITUZIONE DELLA BATTERIA

- Sostituire la batteria quando il simbolo nell'angolo inferiore destro del display LCD inizia a lampeggiare.
- Levare il coperchio della batteria come mostrato nella Figura 3.
- Estrarre delicatamente la scheda di circuito in plastica con la camera della batteria di circa 1 cm (leggermente meno di 1/2") (Figura 4).
- Utilizzare un oggetto appuntito, ad esempio una penna, per rimuovere la vecchia batteria. Smaltire la batteria in modo appropriato. Sostituire con una nuova batteria da 1,5 V CC del tipo LR41 o SR41, UCC392, o equivalente. Assicurarsi che la batteria sia installata con la polarità rivolta verso l'alto (Figura 5).
